

My Communication

We continue working on our attention and turn taking skills through games and communication practice.

We are focussing on spelling, making sure to use our phonics skills to help us.

We also continue to work on our reading and comprehension skills, using textual clues to find out more.

HOME LEARNING: Our online reading books change every fortnight, so we can read at home too! You can also help us by asking to practise reading words when you are out and about.

My Independence

We are working on becoming more independent in preparing ourselves for learning – collecting equipment and engaging with certain tasks by ourselves.

Topic Web Summer 1 2024

Adventures to the Moon

Key Texts:

The Man on the Moon – Simon Bartram
The Skies Above My Eyes – Charlotte Guillain

My Problem Solving

We are working on our number bonds, to consolidate addition and subtraction work done so far this year.

We are also learning about measuring length and weight. We will use these measurements in our data handling.

HOME LEARNING: We could play games to practise number bonds to 5 and 10. We could also have a go at using measuring tapes around the house.

My Imagination

In Music, we are listening to music inspired by space and exploring how it makes us feel.

In Art, we are exploring sculpture and making our own class model of the solar system.

Using Technology

We are learning what an algorithm is, and how to create a basic algorithm.

HOME LEARNING: We have logins for Purple Mash, and Collins E Books, which are safe websites that we can use to practise our skills at home. Log in and let us show you what we're doing.

Myself and Others

We are learning what makes our families special, and to recognise that not all families look the same.

My Health

This half term, we are developing our gymnastic skills using floor equipment.

In cooking, we are making and trying different savoury foods inspired by space, as well as practising our kitchen safety.

HOME LEARNING: If you'd like to try any of the recipes at home, let us know.

My World

This term, we are learning all about space: about the planets in our solar system and the universe beyond.

We are also celebrating some world events:

- Earth Day – 22nd April
- Mental Health Awareness Month – May
- Space Day – May 3rd
